Education

LNCT E | *Computer science engineering*

Bhopal , MP | September 2023 - June 2027

Daisy Public School | *senior secondary*

Rewa , MP | May 2023

Skills

Languages – Java , Java Script

Frontend – React.js, Next.js, HTML5, CSS3

Backend – Node.js , Express.js , Mongoose

Database - MongoDB

Real time communication – Socket.IO , WebRTC

Tools - Git , Docker , Postman

Achievements

- Finalist, Smart India Hackathon (SIH) 2025, developed a scalable software solution under national-level competition
- Secured 1st place in Intra-Institution Business Plan Competition for presenting a viable and innovative business model

Projects

Farm fusion

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO

- Developed a full-stack platform to connect farmers directly with consumers and retailers, reducing dependency on intermediaries
- Implemented real-time communication and notifications using Socket.IO to enable instant negotiation and updates
- Designed RESTful APIs and MongoDB schemas for product listings, orders, and user management

Zen Villa

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, Redis, WebRTC

- Built a real-time communication platform inspired by Omegle, enabling users to create and join private rooms with controlled access
- Implemented peer-to-peer **video and chat** functionality using **WebRTC**, with **Socket.IO** for signaling
- Used **Redis** for efficient room/session handling and improved real-time performance

Experience

Papapet | Backend Developer Intern

Bhopal , MP | 08/2025 – 11/2025

- Developed end-to-end delivery system covering order fetching, payment verification, and product dispatch workflows.
- Designed and implemented MongoDB schemas for doctors, orders, and consultations; built a complete doctor booking system with secure payment verification.
- Integrated Gemini API for a reliable AI-powered health report generator, ensuring consistent uptime and error-free performance.
- Implemented automated email notifications, image optimization, and backend performance improvements using NodeMailer, ImageKit, and optimized APIs.
